

Award winning technical paper

The 1989 Overseas Paper Award from the Institution of Water and Environmental Management has been won by Dr John Davey, UK operations manager of **WPCB** Horizon for his paper on "Wellfield Development for Urban Supplies in PDR Yemen."

The paper, published in the Institution's August journal last year, describes internationally funded groundwater engineering projects which resulted in providing improved accessibility to better quality and quantities of potable water in Greater Aden, Al Mukalla and the Hadramaut Valley. Nearly one third of Yemen's 2.2 million population live in these areas.
